01 PROFILE

Second-year Computer Science & Engineering (Data Science) student with an interest in artificial intelligence, data science, machine learning, and software development. Experience contributing to academic and team projects, with a thoughtful, collaborative approach and a strong willingness to learn.

02 EDUCATION

B.E. Computer Science & Engineering (Data Science)
BITM

2025 – Present

03 PROJECTS & ACADEMIC WORK

Anti-Procrastination YouTube Filter Python

Team project

Contributed to research and literature review for a team-based productivity project focused on reducing online distractions.

Air Quality Monitoring System

Team project

Collaborated as a team member on a technical project focused on air-quality monitoring.

 **2nd Prize** — Air Quality Monitoring System

Inventory & Stock Management System C

Academic assignment

Applied structures, arrays, functions, searching, and file handling in an academic inventory and stock management assignment.

04 TECHNICAL SKILLS

PROGRAMMING C Programming · Python · Java *(currently learning)*

FOUNDATIONS Basic Artificial Intelligence concepts · Basic Data Science concepts

05 SOFT SKILLS

Teamwork · Communication · Problem Solving · Leadership · Adaptability
· Time Management

06 AREAS OF INTEREST

Artificial Intelligence · Data Science · Machine Learning · Software
Development

— Certifications · None at present —
