PROFILE

Second-year Data Science student at Bellari Institute of Technology and Management, interested in AI, Data Science, Machine Learning, and Software Development. Contributed to team-based academic projects through research and literature review. Eager to strengthen technical foundations and learn through practical work.

EDUCATION

Computer Science and Engineering (Data Science)

2025–Present

Bellari Institute of Technology and Management

TECHNICAL SKILLS

Programming: C Programming, Python

Currently learning: Java

Foundations: Basic AI concepts, Basic Data Science concepts

PROJECTS & ACADEMIC WORK

Anti-Procrastination YouTube Filter

Python · Team project

Contributed to research and literature review for a productivity-focused project exploring an anti-procrastination YouTube filter.

Air Quality Monitoring System

Team project · 2nd Prize

Collaborated as a team member on an air-quality project recognized with second prize.

Inventory & Stock Management System

C · Academic assignment

Used structures, arrays, functions, searching, and file handling to organize inventory and stock records.

ACHIEVEMENT

2nd Prize — Air Quality Monitoring System

CERTIFICATION

Advanced C Programming Internship

Organized by Bellari Institute of Technology and Management

SOFT SKILLS

Teamwork · Communication · Problem Solving · Leadership · Adaptability · Time Management

AREAS OF INTEREST

AI · Data Science · Machine Learning · Software Development · Cybersecurity
